Term: The Compartment may not be appropriate for investors who plan to withdraw their money within a short period of time. The life duration of the Compartment is unlimited, cannot be automatically terminated and is suitable for investments with a 5-to-10-year horizon.

Objectives: The Compartment’s investment objective is to generate attractive returns over the long term, by investing in a portfolio of private (non-listed) securities that are carefully selected and approved by the External Manager. There is no reference to a benchmark. The Company seeks to invest in private equity projects that have growth potential, will add value and provide dividends to its investors. The Compartment’s objective is to generate a high and rising level of income over time through investments in a diversified range of private equities. Subject to this, the Compartment aims to provide capital growth over the long term. As the Compartment will be able to invest worldwide in private equity investments the focus will be on opportunistic investments that would allow the Compartment to achieve superior equity returns within a 5-to-10-year horizon. The External Manager may invest in situations that may be overlooked by others, including in companies suffering from capital markets dislocation, financial distress, complexity or negative market sentiment.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Intended retail investor: Investing in this product will not be appropriate for everyone. The Compartment is suitable for Professional and Well-Informed investors who can afford to set aside the capital for the medium- to long-term, who seek an investment with a

medium-to-high risk profile, can bear losses and have been previously exposed to similar investments thus have the required knowledge.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicator:

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You cannot cash in early. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 6 out of 7 which is the second highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the capacity of the Compartment to pay you. Please refer to the Risk Factors Section of the Offering Document for an outline of all risks associated with your investment.

This product does not include any protection from future market performance, so you could lose some or all of your investment. If the Compartment is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios:

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over its lifetime. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The unfavourable scenario shows what you might get back in extreme market circumstances, and it does not consider the situation where we are not able to pay you.

WHAT HAPPENS IF DP AGROFUND PRIVATE EQUITY FUND I IS UNABLE TO PAY OUT?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should we default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

	If you exit after 1 year	If you exit after 5 years (RHP)
Total Costs	36 EUR	36 EUR
Annual cost impact*	0.3%	0.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.3% before costs and 11.0% after costs.
